Tool

The Moisture Balance Calculator tool uses a pre-defined set of questions to perform moisture risk assessment and provide some user-tailored guidance

Questions grouped by categories (moisture generation, occupancy, heating, ventilation and maintenance)

Result to indicate

Whether home is in balance /possibly out of balance/out of balance

Which sections need action/review to improve

Where to go for further advice

Moisture Balance Calculator

Beta version

Moisture balance calculator

About

MOISTURE BALANCE CALCULATOR

YOU NEED A BALANCED AMOUNT OF MOISTURE TO MAINTAIN A HEALTHY HOME. THIS MEANS HAVING A BUILDING WHICH IS NOT TOO DRY AND NOT TOO MOIST. KEEPING YOUR HOME IN BALANCE CAN BE TRICKY AS THERE ARE A LOT OF FACTORS TO THINK ABOUT SUCH AS THE MOISTURE YOU GENERATE IN COOKING, WASHING AND SO ON, AND YOUR HEATING, VENTILATION AND MAINTENANCE.

USING THIS TOOL SHOULD GIVE YOU A BETTER UNDERSTANDING OF THE MOISTURE BALANCE IN YOUR HOME AND THE FACTORS AT PLAY. IF YOUR HOME IS OUT OF BALANCE, YOU MIGHT BE ABLE TO IDENTIFY EASY WAYS TO REGAIN MOISTURE BALANCE AND CREATE A HEALTHIER HOME.
