Reports on the Technical Working Groups and how to get involved

Technical Working Groups

Some of the aims of the UKCMB technical working groups are:

- Identifying the main areas of concern in regard to knowledge gaps, risk, impact, practice, standards, policy etc.
- Developing a programme of research or action (including communications, policy, standards, legal work) to address the main areas of concern
- Identifying possible partners, collaborators, funders or advocates for programmes of research or action
- Working with UKCMB management to initiate programmes of research or action
